Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction

Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translation and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

- Simple type theory (STT) is also known as Higher order logic (HOL).
- HOL = simply typed λ-Calculus + boolean types + axioms + inference rules.
- Most mathematical objects/theories can be expressed in HOL.
- Interactive and automatic theorem provers & proof checkers for formal mathematics.
- HOL Light, ProofPower, HOL4, HOL Zero ... [HOL family].
- The first talk by Tom Hales: Kepler Conjecture

## Kernel

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translatior and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

#### HOL syntax:

type variables $\alpha, \beta$ type operatorsptypes $A, B ::= \alpha \mid p(A_1, \dots, A_n)$ term variablesx, yterm constantscterms $M, N ::= x \mid \lambda x : A.M \mid MN \mid c$ 

#### Polymorphic Type:

 $=: \alpha \rightarrow \alpha \rightarrow o$

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboratior

**OpenTheory** Version 5 & 6

Proof Translation and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

- HOL family: HOL Light, ProofPower, HOL4, Isabelle ....
- Need a platform to reuse proofs from different systems.
- OpenTheory has a standard format of proofs (\*.art).
- Export proofs and import proofs (in article files).
- OpenTheory HOL Light:
  - a modified version of HOL Light which allows import and export of proofs.
- http://www.gilith.com/research/opentheory/

## News from OpenTheory

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory

Version 5 & 6

Proof Translatior and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

OpenTheory is updating constantly, so will Holide and Dedukti.

Today's Topics:

- 1. Re: package upload failed (Joe Leslie-Hurd)
- 2. Re: interpretation in separate file (Joe Leslie-Hurd)

# Holide and Dedukti

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translation and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

- OpenTheory has a repository of proof packages (articles).
- Holide translates proofs from OpenTheory articles to Dedukti.
- Dedukti<sup>1</sup> is a proof checker (for proof checking).
- from a reviewer: It is not clear from the abstract whether the author has contributed to the development of Holide or Dedukti

## Workflow of OpenTheory, Holide and Dedukti

Conclusion

#### Translation

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translation and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

translate  $\left(\begin{array}{c} \Gamma \vdash \varphi = \psi \\ \overline{\Gamma} \vdash \psi = \varphi \end{array} sym \right) = Sym|A||t_1||t_2|$ translate  $\left(\begin{array}{c} \Gamma \vdash s = t & \Delta \vdash t = u \\ \overline{\Gamma} \cup \Delta \vdash s = u \end{array} trans \right) =$ Trans|A||x||y||z||D\_1||D\_2|, where  $D_1$  is the proof of s = tand  $D_1$  is the proof of t = utranslate  $\left(\begin{array}{c} \Gamma \vdash \varphi & \Delta \vdash \psi \\ \overline{\Gamma} \cup (\Delta \setminus \{\varphi\}) \vdash \psi \end{array} proveHyp \right) =$ ProveHyp|x||y||D\_1|( $\lambda x : ||\psi||.|D_2|$ ), where  $D_1$  is the proof of  $\varphi$  and  $D_2$  is the proof of  $\psi$ .

## Evaluation

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

#### Proof Translation and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

- Fully verified all the libraries in OpenTheory.
- Little difference between version 5 and version 6.
- The size of proof articles got reduced by around 7%. The proof checking time reduced by around 5%.
- These benchmarks were generated on a 64-bit Intel Core i5-4590 CPU @3.30GHz ×4 PC with 3.8GB RAM.

# Kepler Conjecture

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translation and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

- 20 years to complete
- The formal proof of Kepler Conjecture takes about 5000 hours to check (in HOL Light) in 2014.

What if we check by Dedukti?

## ProofCloud

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translatior and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

**1** A Proof Retrievel Engine:

http://airobert.github.io/proofcloud/

- 2 1700+ pages of proofs with analysis.
- 3 A representation of proof checking results by Holide and Dedukti.

4 Which proofs are constructive?

# Version 2

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translatior and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

Proof Search Engine which represents the analysis and proof checking results.

Figure: Index Page of ProofCloud (version 1)

It's version 2 now !!!

### Demo

#### Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translatior and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

- So far there are 6 packages: base, stream, probability, natural-bits, natural-divides and natural-prime.
- For the natural-prime package: http://airobert. github.io/proofcloud/natural-prime.html

- ADD\_EQ\_0
- $\blacksquare !mn.m+n=0 \Leftrightarrow m=0 \land n=0$

## Structural Analysis

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translatior and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

the combination of the subst and eqmp rule takes over 45% of all the inferences rules.

Inference Rules	Count
subst	93667
eqmp	92617
appthm	53155
proveHyp	47728
betaConv	21485
absThm	15096
assume	16986
Overall	413207

## Structural Results

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translatio and Proof Checking

Proof Retrieval Engine: ProofCloud The frequency of subst and eqmp combined is over 45%

Main Inference Rules of OpenTheory Articles

Figure: Frequency of Main Inference Rules of OpenTheory Articles

And more for each individual theorem or combine with Machine Learning?

## Statistical Results

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translatior and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

1209 proofs in the standard library.541 constructive proofs v.s. 668 classical proofs44.75% of them constructive proofs.

In contrast, the *natural-divides* package has only 10 constructive proofs out of 136 proofs, making only 7.35% of them constructive.

Next, these 668 proofs to their constructive form?

## ProofCloud 3?

Proof Engineering of Higher Order Logic

Robert White (Shuai Wang)

Introduction Higher Order Logic HOL Kernel Inference Rules

Proof Collaboration OpenTheory Version 5 & 6

Proof Translation and Proof Checking

Proof Retrieval Engine: ProofCloud

Conclusion

- More OpenTheory packages and even Coq, Mizar ... libraries?
- Better GUI
- Better searching accuracy
- More text description of theorems (at least a proper name)
- A proof analysis engine combined with machine learning as a feature suggestion engine after comparing thousands of proofs?
